(54) STORAGE MEDIUM HAVING ELECTRONIC CIRCUIT AND METHOD FOR USING THE SAME

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a storage medium having an electronic circuit in which control corresponding to the characteristics of the information of an information storage part can be easily prepared, and a method for using it.

SOLUTION: In an intelligent disk 1 having a disk part 3 which stores information and an intelligent circuit part 2 which processes the information, information to be reproduced by an outside device 10 is stored in the disk part 3, and a parameter for controlling the reproduction of the information by the outside device 10 is stored in the electronic circuit part 2. The information is reproduced by the outside device 10 by using the parameter.
